

Why You Should Replace Your Engine or Transmission Instead of Your Car!

You'll save MONEY, TIME and Gain PEACE OF MIND!

Look At the Facts . . .then Choose JASPER!

- ***The money you save with a JASPER remanufactured product can be used to improve your family's quality of life – vacations, college education, early retirement.***
 - Significantly less expensive than buying a new car, the price of which averages in excess of \$20,000.
 - New cars incur higher taxes and license fees, increased insurance costs and depreciation.
- ***JASPER offers a 3 year/100,000 mile parts and labor transferable nationwide warranty, increasing your vehicle's value.***
 - Used cars may have hidden problems and minimal, if any, warranty.
 - Used engines and transmissions may have high miles, a poor maintenance history, and little or no warranty.
- ***JASPER's remanufacturing procedures correct design problems in the original engine or transmission*** — overhauls generally replace only severely defective parts and take longer.
- ***Every product is remanufactured to meet or exceed original specifications.***
