

Environmental Sustainability & Comparisons

NewCore GmbH conducted an environmental sustainability study on Jasper Engines and Transmissions and calculated the conversion of energy savings regarding all products remanufactured in 2022.

CO₂ Savings

Saved as much CO₂ as 3,000 acres of forest store

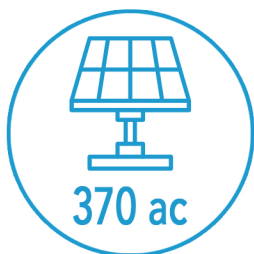

Saved as much CO₂ as a modern car emits by driving around the world 9,000 times

Raw Material Savings

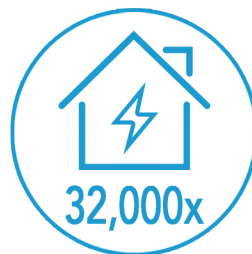

Conserved about 27,000 U.S. tons of material, enough to produce approximately 13,000 new cars

Energy Savings

Saved as much energy as 370 acres of solar panels can produce in a year

Conserved as much energy as about 32,000 households consume per year

By purchasing a JASPER® remanufactured product, not only are you buying the highest quality powertrain product in the industry, you are contributing to environmental preservation.
