

FORD 10R80 Transmission

The OEM aluminum C-D-F drum has a pressed-in sleeve that is prone to movement, causing the sealing ring to leak, resulting in transmission slippage or gear ratio codes. JASPER installs a 100% updated stepped-design drum assembly. This design prevents the sleeve from sliding in the bore.

3 YEAR / 100,000 MILE NATIONWIDE | TRANSFERABLE WARRANTY

A JASPER® Remanufactured 10R80 Transmission is Your Best Option for Replacement!

JASPER's value-added quality improvements will provide you with confidence and reliability.
