
FORD 6F35/50/55

Value Added Quality Improvements from JASPER®

Issue / Concern:

JASPER Solution:

Solenoid Failure

- Solenoid pack is 100% tested to verify proper operating specifications before installation.

Speed Sensor Failure

- Speed sensors are 100% tested to confirm correct operation before installation.

IMS (Internal Mode Switch) Failure

- IMS (Internal Mode Switch) is tested through all ranges to ensure proper gear command.

Valve Body and Bore Wear:
Resulting in erratic shifts and loss of hydraulic integrity.

- JASPER® 100% remanufactures and vacuum tests the valve body to ensure proper hydraulic functionality.

Shifting/Clutch Slipping Concerns

- 100% installation of OEM clutches.

Transmission TCM Programming

- JASPER offers rental of a remote programming device.

6F35 Only:

Axle Driven Sprocket Case Wear

- JASPER 100% machines the transmission case where the axle driven sprocket bearing rides, and installs a steel shim. This will eliminate any future case wear.
